# TOROS ÜNIVERSITESI

Faculty Of Engineering Industrial Engineering (English)

#### **Course Information**

INTRODUCTION TO INDUSTRIAL ENGINEERING					
Code	Semester	Theoretical	Practice	National Credit	ECTS Credit
		Hour / Week			
INE111	Fall	3	0	3	3

Prerequisites and co- requisites	none
Language of instruction	English
Туре	Required
Level of Course	Bachelor's
Lecturer	Prof. Dr. Yusuf ZEREN
Mode of Delivery	Face to Face
Suggested Subject	none
Professional practise ( internship )	None
Objectives of the Course	The aim is to define industrial engineering, describe its place in the business world and give a broad picture of the functional areas with some solution techniques.
Contents of the Course	This course provides an introduction to industrial engineering. The history of industrial engineering, function areas of industrial engineering and the operations research systems will be teach to students.

# **Learning Outcomes of Course**

#	Learning Outcomes	
1	Student will gain main information about industrial engineering and s/he will be able to apply these information in real life.	
2	Student gains mental power for thinking on manufacturing systems.	
3	Student gains main information on undegraduate lectures and internships.	
4		

# **Course Syllabus**

#	Subjects	Teaching Methods and Technics
1	Definitions and examples reletad to industrial engineering	Lecturing
2	Modeling to orginizational structure and the facility layout	Lecturing
3	Project management	Lecturing
4	Information systems	Lecturing
5	Supply chain management	Lecturing
6	Supply chain management	Lecturing
7	Midterm	Exam
8	Scheduling	Lecturing
9	Enterpreise Resource Planning and Material requirements planning (MRP)	Lecturing
10	Human Factors	Lecturing
11	Ergonomics	Lecturing
12	Introduction to quality engineering	Lecturing

13	Interface with suppliers and subcontractors	Lecturing
14	Introduction to service engineering	Lecturing
15	Introduction to operations research	Lecturing
16	Final Exam	Exam

## **Course Syllabus**

#	Material / Resources	Information About Resources	Reference / Recommended Resources
1	Introduction to Industrial Engineering, Shtub A., Cohen Y. CRC Press		
2	Introduction to Industrial and Sytems Engineering, Turner W.C., Mize J.H., Case K.E. Prentice-Hall.		

#### **Method of Assessment**

#	Weight	Work Type	Work Title		
1	1 40% Mid-Term Exam		Mid-Term Exam		
2	60%	Final Exam	Final Exam		

## Relationship between Learning Outcomes of Course and Program Outcomes

#	Learning Outcomes	Program Outcomes	Method of Assessment
1	Student will gain main information about industrial engineering and s/he will be able to apply these information in real life.	9	1,2
2	Student gains mental power for thinking on manufacturing systems.	9	1,2
3	Student gains main information on undegraduate lectures and internships.	9	1,2
4			

PS. The numbers, which are shown in the column Method of Assessment, presents the methods shown in the previous table, titled as Method of Assessment.

#### **Work Load Details**

#	Type of Work	Quantity	Time (Hour)	Work Load
1	Course Duration	14	3	42
2	Course Duration Except Class (Preliminary Study, Enhancement)	14	3	42
3	Presentation and Seminar Preparation	0	0	0
4	Web Research, Library and Archival Work	0	0	0
5	Document/Information Listing	0	0	0
6	Workshop	0	0	0
7	Preparation for Midterm Exam	1	3	3
8	Midterm Exam	1	1	1
9	Quiz	0	0	0
10	Homework	0	0	0
11	Midterm Project	0	0	0
12	Midterm Exercise	0	0	0
13	Final Project	0	0	0
14	Final Exercise	0	0	0
15	Preparation for Final Exam	1	1	1
16	Final Exam	1	1	1
