Course Information

PROFESSIONAL PRACTICE					
Code	Semester	Theoretical	Practice	National Credit	ECTS Credit
		Hour / Week			
ARC425	Fall	3	0	3	4

Prerequisites and co-requisites	
Language of instruction	Turkish
Type	Required
Level of Course	Bachelor's
Lecturer	Öğr. Gör. Mehmet Burak Taşerimez
Mode of Delivery	Face to Face
Suggested Subject	
Professional practise (internship)	None
Objectives of the Course	The course systematically describes the potential "working areas" in the architectural profession and aims to prepare the student for the profession. The course aims to define pro actors esi and oluşturul resources oluşturul in architectural practice, which define the basic needs, formulate, elaborate and implement the project. It is aimed to prepare and submit a given topic to the students as an application project and to define what the necessary preparations for the presentation to the customer should be. In this course, basic concepts such as customer relations, project management, role sharing, project supervision and process management are examined.
Contents of the Course	Within the scope of the course, the preparation process of a project from the draft status to implementation project and license project, document management, project management, construction site establishment and management as well as definitions through the current zoning regulation are explained.

Learning Outcomes of Course

#	Learning Outcomes
1	To identify about occupational practice
2	To identify about occupational ethics, laws and basic responsibilities
3	To manage process of project application
4	To define basic actors in application process
5	To use the resources
6	To manage cost and time management in application process

Course Syllabus

#	Subjects	Teaching Methods and Technics
1	Practical application of basic knowledge of architecture	Studies, surveys, drawings
2	Actors and resources in professional practice	Studies, surveys, drawings
3	Actors and resources in professional practice	Studies, surveys, drawings
4	Project presentation and portfolio preparation process	Studies, surveys, drawings
5	The project process management and professional ethics	Studies, surveys, drawings
6	The selection of project implementation issues	Studies, surveys, drawings

7	Preparation and presentation of the project alternatives	Studies, surveys, drawings
8	Mid-term	
9	The development of projects and studio work	Studies, surveys, drawings
10	The development of projects and studio work	Studies, surveys, drawings
11	Points of detail drawings and material selections	Studies, surveys, drawings
12	Points of detail drawings and material selections	Studies, surveys, drawings
13	Points of detail drawings and material selections	Studies, surveys, drawings
14	Project plans, sections, point details, material selection and completion of metering account.	Studies, surveys, drawings
15	Delivery and presentation of work	Studies, surveys, drawings
16	Final Exam
